

VIDEO EDITING

ACHIEVABLE FILMING AND EDITING WORK-FLOW IN THE CLASSROOM

THE EASY WAY TO MAKE A QUALITY VIDEO

- Do

- Plan first with a storyboard
- Quality sound is equal to quality video
- Film multiple takes at a time
- Treat the camera as the audience, show it what you want it to see and hide from it what you don't.
- Experiment with different shooting and editing, i.e. angles, camera movements, fast or slow cuts.

- Don't

- Film in portrait
- Look at the camera unless it is intentional
- Finish filming until you have reviewed your work
- Hold the camera by hand where possible
- Allow others to enter your shot
- Forget you are telling a story
